Established in 1998, Beer & Young has become a market leader, delivering equity solutions to SME's. We own a large, mature and active network of private investors, have strong connections with debt providers and have gained a reputation for delivering capital solutions quickly for business owners. We raise capital between £250,000 and £25 million in equity or debt.

Working capital is the lifeblood of business, SME's in particular. Whether the business is trading and looking for additional capital, an established business in urgent need of capital, or an exceptional early stage/start-up seeking funding, B&Y is here to help.

Over the past eight years we have raised nearly £75million in capital with a good mix of high growth, development capital and turnaround projects. Historically we've been known for our work in the turnaround sector and we remain very active here. Having said this, the majority of our highlighted successes are trading businesses who sought capital to realise their growth opportunities.

As a multi-award winner, we're very proud to represent our business community, helping deliver capital to a vital part of the economy. 2022 will be a challenging year for many business owners and entrepreneurs. For others there are significant growth opportunities; we also expect to see more funding required for acquisitions during this year. Whatever your circumstance, we're here to help you achieve your funding needs and objectives. We look forward to talking with you.

Development Capital

Salary Advance Platform	£1,000,000	Fintech	Our investors supported this funding round, the concluding element to a merge between themselves and a similar sized competitor. The capital raise was further supported by the Government's Future Fund and resulted in new capital in excess of £1 million moving through 2021.
Phone and Computer Repairs	£500,000	Information Technology	This leading authorised mobile phone and computer repair company came under financial pressure due to a brief hiatus from one of its major clients. We were able to raise funds from two experienced investors.
Property Part Exchange Services	£2,000,000+	Property	We were approached by this property trading company to secure a significantly larger funding facility on much more favourable terms. Agreements were quickly made with a private fund, who had the knowledge and capacity to support the company long term.

Development Capital

Health Data Science Platform	£300,000	Healthtech	In double quick time, we were able to arrange online meetings with a handful of key, targeted investors for this growing healthtech business. The majority with vast knowledge and expertise in the sector. Our investors delivered working capital bridge in order to accelerate sales growth prior to a Series A round.
Data Capture Solutions	£400,000	Information Technology	The subscription-based tool enables management to better monitor performance. Due to the new capital B&Y raised and, crucially, a guiding hand from our investors, the company is on the brink of rapid expansion.
Vehicle Finance	£2,000,000	Financial Services	Our client is an ethical lender in the sub-prime car finance market. They are privately funded and sought further capital from investors to increase their lending capacity. Three investors from our network have now funded the company.

Turnaround

Special Interest
Publishing

£600,000

Publishing

Our clients offering is nationally recognised and historically successful. However, having branched out, they encountered serious cashflow problems. We dealt with the critical issues from major creditors and HMRC, and delivered new investment from private investors with industry experience. The company is now delivering rising revenues and profits.

Smart Energy

£400,000

Manufacturing

We quickly calmed the situation down, introduced serious investors and liquidity is no longer an issue for our client who provides bespoke smart energy metering, monitoring and control systems across the UK.

Specialist
Structural Welding
Services

£200,000

Construction
Services

Our client provides specialist welding services to prestigious projects. Seeking funding for growth opportunities as well as dealing with their own cashflow pressures. We found an investor who offered a mentor role as well as the new capital required.

Early Stage Capital

Gym Franchise	£465,000	Leisure Sector	Based on quick group workouts, the gym franchise has taken the world by storm and required funding to expand in the UK. Our experience in dealing with lenders ensured that the fundraise was completed by a combination of a single HNW and a major bank.
Property Platform	£Undisclosed	Property Rental	A digital platform to disrupt activities carried out by letting agencies using clunky paper-based systems. Having already raised their SEIS allowance, our investor came in with second round funding under EIS to help further the technology and enable our clients to come to market.

Corporate Advisory

Specialist Financial Services	£5,000,000 loan	Financial Services	We raised £5million as a loan facility to this successful group in financial services. We negotiated and constructed terms which suited both client and investor.
Niche Retail Finance	£2,000,000 debt + £90,000 equity	Retail	The business allows clients to offer retail finance to their customers. Profitable since inception, the management team recognised the need to grow the loan book. We delivered a combined equity and debt package that will support business growth over the coming years.

£1,000,000 Growth Funding for Salary Advance Platform

Our client completed their funding round, this being the concluding element to a merge between themselves and a similar sized competitor. The capital raise was further supported by the Government's Future Fund and resulted in new capital in excess of £1million.

We first worked with our client in 2019 as a pre-revenue business. We sourced and helped arrange a seven figure debt facility from a private fund, sourced early equity as well as other practical support to enable the business to start trading.

Investment and Outcome

Having remained in close contact with the client, we were pleased to help bring in an additional £300,000 from our investors to compliment funds already committed in the merge. In addition to investment, one of our investors accepted the post of Chairman and as a highly experienced FTSE100 CEO, he will provide strong governance and excellent advice, guidance and direction for the combined business.

The company is an innovative low risk financial benefit provider that mirrors the well-established and booming salary advance market in the US. Their model incorporates not just a salary advance offering, but also third-party financial planning and credit union loans, and a soon to be launched E-Money Debit Card. Our client uses a tripartite agreement between the employer, employee and the Company, thus ensuring the salary advances are repaid directly from the employee's salary.

“ *By merging the companies we are able to deepen the Financial Education service and offer Financial Coaching to workers.*

Financial Education is seen in the market place as vital to a Wellness product and having the ability to provide an IFA approved Financial Education product gives us a unique offering versus the competition.

New Capital

£1,000,000

£500,000 Funding for Phone and Computer Repairs

Our client is the only UK company with full manufacturers' accreditations from two leading suppliers and is at the forefront of the drive to deliver fast and reliable repair services to a growing repairs market. It has experienced high growth in the last 12 months. The funding was required to help with short-term cashflow issues and to support the expected accelerated growth over the next 12-24 months.

Investment and Outcome

From our network of High Net Worth investors, we shortlisted and contacted a select number of individuals who we believed would be the right fit for our client. Three corporate investment firms, including two HNW individuals who have previously invested with B&Y, were extremely keen.

While we began engaging with potential investors, our client experienced a brief hiatus in volumes from one of its major patrons. The company quickly became under increased financial pressure.

The B&Y team worked tirelessly, engaging with a consortium comprised of a boutique private equity firm and two experienced individuals. Ultimately, we were able to rapidly raise funds from two investors, avoiding a major cost cutting. Our client is now not only well-funded but also has two active, experienced investors to help the business reach its market potential.

“ I approached B&Y as I was looking for investors that would help us overcome short term challenges and ultimately help us drive growth and profitability. Throughout the process B&Y were solid advisors and helped me find the clever money that I was seeking. The investment was achieved quickly and to the deadline that we had been set by circumstances. I'm confident we have the right team on board to help us bring the rigour and discipline we need to drive the business forward. ”

£500,000

£300,000 Capital Raise for Healthtech

Our client, a growing healthtech business, was referred to us to raise a working capital bridge in order to accelerate sales growth prior to a Series A round.

The company is the UK's leader in delivering predictive analytics to the NHS and Pharma industry. While planning a £10m Series A funding round, the Board identified the need for £300k of investment to accelerate recruitment of key sales and business development roles needed in the current Covid-19 environment.

The main funder to date, an EIS fund, was firefighting with its leisure and hospitality portfolio, and agreed to invite new HNW investors into the company for this bridging round. We were approached to help with this raise, with an emphasis on fast results needed.

Investment and Outcome

We immediately approached our large network of HNW investors and family offices. Despite the current economic climate, we were able to arrange online meetings with a handful of key, targeted investors, the majority with vast knowledge and expertise in the sector. Two HNWs proceeded to make an investment, both completing within four weeks of receiving our approach.

“ *We were delighted to have been referred into this exciting company and have an opportunity of presenting the management team to our investors. Healthcare is not a sector in which we have specialised and it's particularly pleasing that we were successful in this instance and demonstrates once again the value and reach of our investor network.* ”

£300,000

£600,000 for Special Interest Publisher

If you read The Times you will no doubt have come across our client's work as a premium, independent publisher of special interest content.

We were approached after new free monthly magazine venture failed to meet advertising revenue targets – they were experiencing losses and needed a rapid injection of funds to aid cash-flow.

The client was exhibiting all the distress symptoms of a classic turnaround with HMRC demanding immediate payments and a large trade creditor threatening to cease all business.

We negotiated payment plans with both HMRC and the major supplier. With all immediately distressing items addressed, we focused on securing an investor who could not only provide the required funding but also take an active role at board level.

The end result was that we concluded an investment with £600,000 equity into the business and delivered a beefed-up board to take on the challenges ahead.

“ I couldn't speak more highly of my experience with B&Y. I first met Nick a few years ago having heard so many positive comments about B&Y. Once engaged with them, I was impressed by the diligence of their work and of course the interest they generated from genuine investors. It's great to sit down with investors who understand the sector and I'm naturally delighted to have closed this funding round. I will happily recommend B&Y to any entrepreneur seeking capital.
